DETAILED ACTION

Election/Restrictions

1. Claims 19-45 are in condition for allowance. The restriction requirement among species, as set forth in the Office action mailed on 10/03/2003, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

2. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim(s) presented in a continuation or divisional application include all the limitations of a claim that is allowable in the present application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons for Allowance

3. Claims 19-45 are in condition for allowance.

4. The following is a statement of reasons for allowance: the subject matter of the independent claim could either not be found or was not suggested in the prior art of record. The subject matter not found was a balloon for a medical device formed from a polymer material comprising a melt blend product with the polymers engineered to have

Art Unit: 3763

the specified flexural moduli as claimed and being of the specific combination of materials as claimed.

5. The closest prior art of record is US Patent 5,270,086, issued to Hamlin. Hamlin discloses multilayer extrusions of angioplasty balloons. Hamlin discloses individual layers having melt bonding characteristics, but does not disclose the different polymers and layers being melt blended together, specifically as claimed. The different polymers of the Hamlin patent are individual, and are adhered with a glue to the other layers, rather than being melt-blended together. Furthermore, Hamlin does not disclose the specific combinations of polymers having the specified characteristics (flexural modulus, etc.) as required by the instant application. The specific combination as claimed in the independent claim is not suggested in the prior art.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
